Education

2018 – 2019 **Carnegie Mellon University, Pittsburgh**
M.S. in Computer Vision

2012 – 2016 **Jamia Millia Islamia, New Delhi**
B.Tech. in Computer Science

Work Experience

Relevant Work Experience

March '17 – April '18 **Research Assistant.** CVIT lab, IIIT Hyderabad

– Formulated a self-supervised approach for the problem of unsupervised visual grounding of phrases and obtained state-of-art results on multiple datasets. Work under review at AAAI 2019.

– Trained a small obstacle segmentation model for autonomous vehicles using as few as 135 frames by exploiting structure in the road scene data. Work presented at ICRA 2018.

– Formulated a Gaussian Process based synthetic data generation scheme and built an online prediction model for real-time video stabilization in virtual camera simulation.

June '16 – Feb '17 **Research Engineer.** Cube26 Pvt Ltd, New Delhi

– Implemented multiple papers in the neural art domain (perceptual losses by Johnson et al and instance normalization by Ulyanov et al) for real-time stylization of images. Models deployed to tens of thousands of devices.

– Incorporated object-level contextual information to improve scene classification in CNNs. Also conducted qualitative analysis to understand how the model differs from previous models. Work presented at CVPR 2017 SUN workshop.

– Refined online spam detection and classification models for SMS on mobile devices using passive-aggressive. Models deployed to tens of thousands of devices.

– Explored LDA and Bayesian Optimization using GP priors & Thomson Sampling for recommendation systems.

– Benchmarked LSTM models for spoken language identification in speech signals obtained from videos.

Nov '16 – Dec '16 **Freelance Computer Vision Developer.** Netra Inc, Remote

– Built a deep neural architecture for logo recognition in social media images.

June '14 – July '14 **Summer Intern.** Reliance Industries Pvt Ltd, Dahej

– Built a vision based fire detection system for open industrial setting.

Other work experience

Dec '15 – Jan '16 **Product Developer.** Servify, Mumbai

– Designed the backend architecture and developed server-side APIs on Node.js

May '15 – July '15 **Summer Intern.** Mahindra Retail Pvt Ltd, Bengaluru

– Worked on the gamification of BabyOye-Mahindra website.

Feb '15 – April '15 **Backend Developer.** Whomely Inc, New Delhi

– Developed web-based solutions using Django/Python.

Research Papers and Preprints

1. Javed, S. A., Achary, S., Vinjamoori, A., & Gandhi, V. (2018). Learning to stabilize videos in real-time. *To be submitted to Eurographics 2019 or CVPR 2019*.
2. Javed, S. A., Saxena, S., & Gandhi, V. (2018). Learning unsupervised visual grounding through semantic self-supervision. *Under review at AAAI 2019*.
3. Gupta, K., Javed, S. A., Gandhi, V., & Krishna, K. M. (2018). Mergenet: a deep net architecture for small obstacle discovery. *ICRA 2018*.
4. Javed, S. A. & Nelakanti, A. K. (2017). Object-level context modeling for scene classification with context-cnn. *CVPR 2017, SUN workshop*.
5. Ahmad, M., Ahmad, F., & Javed, S. A. (2017). Cryptanalysis of an asymmetric image cryptosystem based on synchronized unified chaotic system and cnn. In *Proceedings of the international conference on intelligent computing and communication*.

Key Academic Projects

- **Event recognition in complex videos using multi stream CNNs**

  Explored fusion techniques for the spatial (static frames) and temporal (stacked optical flow) streams from a CNN as proposed in the two-stream CNN paper by Simonyan et al. Also modeled temporal information in videos using LSTMs.

- **Understanding the role of context in object recognition**

  Used a conditional random field to model geometric, semantic and spatial context to improve object recognition as done by Rabinovich et al. Also evaluated GIST for global, scene-level priming.

- **Localization and identification of street view house numbers in Gmail captchas**

  Used blob extraction techniques on Gmail captchas for localization of street view numbers and then trained a deep CNN as an end-to-end system on SVHN dataset to automate captcha reading.

- **Image segmentation through Normalized Cuts**

  Implemented the normalized cut algorithm for image segmentation.
